

MEMBER VESSEL INSPECTION CHECKLIST

- **EXTERIOR VISUAL INSPECTION UPON ARRIVAL:**

1. New boats must arrive under its own power, either motor or sail. Vessel cannot be towed in.
2. Upon request all vessels must demonstrate the capability of moving under their own power. (if the boat is equipped with a motor, than they must demonstrate the capability of moving by use the motor)
3. Is the registration current and clearly displayed? If documented, owner must provide proof of documentation.
4. Is the vessel clean and in good appearance?
5. Is the deck free of debris and non-essential items?
6. Is the vessel well maintained with no signs of needing repair/maintenance?

- **INTERIOR INSPECTION:**

1. Check for bilge pumps and their operational status. Ensure bilges are free of oil.
2. Is there an operating head? If yes, ensure it is operational and connected to a dedicated holding tank.
3. Y valve must be tied off to prevent accidental discharge of holding tanks
4. Insert dye tablets and inspect for external leaks
5. Does it have a galley? If so, the stove must be permanently affixed. No portable stoves allowed. If the stove is gas fed, does it have an operational solenoid control switch and is the gas/fuel tank vented properly overboard?
6. If the vessel has a provision for AC shore power, does it have an AC circuit panel w/main circuit breaker?
7. Vessel must have the correct number and type of fire extinguisher on board, and they must be in good operating condition.
